

IMPORTANT: Investment involves risk, including the loss of principal. Investors should refer to the Prospectus and Key Facts Statement of the iShares FTSE China A50 ETF (the "ETF") for details, including the risk factors. Investors should not base investment decisions on this marketing material alone. Investors should note:

- The ETF aims to provide investment results that, before fees and expenses, closely correspond to the performance of the FTSE China A50 Index ("the Underlying Index").
- Generally, investments in emerging markets, such as the A Share market, may involve increased risks such as liquidity risks, currency risks/control, political and economic uncertainties, legal, regulatory and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility. The A Share market may be more volatile and unstable than those in the more developed markets. The ETF's exposure is concentrated in the PRC and may be more volatile than funds adopting a more diversified strategy.
- The ETF is subject to tracking error risk, which is the risk that its performance may not track that of the Underlying Index exactly.
- The ETF is subject to restrictions and requirements applicable to QFII / RQFII investment, and the applicable laws, rules and regulations in the PRC, which are subject to change and such change may have potential retrospective effect. The ETF may be unable to invest via the QFII/RQFII status of each QFII/RQFII Licence Holder including if the approval of the relevant QFII/RQFII Licence Holder is revoked/terminated or otherwise invalidated as the ETF may be prohibited from trading of relevant securities and repatriation of the ETF's monies, or if any of the key operators (including the QFII/RQFII Custodians and PRC broker) is bankrupt or in default and/or is disqualified from performing its obligations (including execution or settlement of any transaction or transfer of monies or securities).
- The relevant rules and regulations on the Stock Connect are subject to change. The Stock Connect is subject to quota limitations. Where a suspension in the trading through the programme is effected, the ETF's ability to invest in A shares through Stock Connect will be adversely affected.
- The ETF currently does not provision for withholding tax on capital gains ("CGT") arising from its investment via CAAPs, QFII or RQFII on or after 17 November 2014, or its investment via Stock Connect. There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realized on the ETF's PRC investments, which may have retrospective effect. Any increased tax liabilities on the ETF may adversely affect its value, and the resultant tax liability would be eventually borne by investors.
- All units will receive distributions in the base currency (RMB) only. The Manager may at its discretion pay dividends out of capital or effectively out of capital which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of or effectively out of the ETF's capital may result in an immediate reduction of the ETF's NAV per unit.
- In the event that a unitholder has no RMB account, the unitholder may have to bear (i) the fees and charges associated with the conversion of such dividend distributions from RMB to HKD or any other currency; and (ii) other bank or financial institutional fees and charges associated with the handling of the distribution payment in currencies other than RMB. Unitholders are advised to check with their brokers regarding arrangements for distribution.
- The trading price of the units of the ETF on the SEHK is subject to market forces and may trade at a substantial premium/discount to the ETF's NAV.

INVESTMENT OBJECTIVE

The iShares FTSE China A50 ETF seeks to track the investment results of an index composed of the 50 largest companies in mainland China, trading on the Shanghai and Shenzhen Stock Exchanges.

WHY 2823 / 82823?

- 1 Exposure to the 50 largest China A-share companies
- 2 Access to market liquidity for mainland China exposure

GROWTH OF 10,000 CNY SINCE INCEPTION

The chart shows change of investment amount based on a hypothetical investment in the Fund.

Disclaimer Unless otherwise specified, all information as of the month end. Sources: BlackRock and FTSE. The above iShares Funds data is for information only.

Investment involves risk, including possible loss of principal. Investment in emerging market countries may involve heightened risks such as increased volatility and lower trading volume, and may be subject to a greater risk of loss than investment in a developed country. Before deciding to invest, investors should read the Prospectus and Key Fact Statements for details, including the risk factors. Performance is calculated on NAV to NAV basis, inclusive of all transaction fees and assumes dividend reinvestment. The investment returns are denominated in base currency, which may be a foreign currency. If so, US/HK dollar-based investors are therefore exposed to fluctuations in the US/HK dollar/foreign currency exchange rate. Rates of exchange may cause the value of investments to go up or down. Investors may not get back the amount they invest. Individual stock prices/performance do not represent the return of the Fund. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Index returns are for illustrative purposes only and do not represent actual iShares Funds or iShares Trusts performance. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance shown is not indicative of future performance.
