For further clarification on this investment policy and potential risks, what should you do?

- Read the full prospectus or seek advice from the management company or its appointed selling agents.
- Do not invest without sufficient understanding on the characteristics and risks of this Fund.

What are the key risks of the Fund?

Warnings & Recommendation

- 1.This fund has no capital protection scheme.
- 2.This mutual fund's investment is highly concentrated in German and therefore investors should consider diversify the risks in their portfolio.

3.The investment of db x-trackers DAX UCITS ETF (DR) is mainly denominated in euro,so,in order to reduce such FX translation risk,TMB German Equity Fund may enter into FX swap and/or forward or futures to hedge currency risk exposures,depending on fund manager's discretion, unitholders may lose or gain value from foreign exchange movement. Since db x-trackers DAX UCITS ETF (DR) with funding from investors in euro and to invest in the euro.There is no foreign exchange risk.

4.Because of the master fund may invest in derivatives for efficient portfolio management purpose upon fund manager's judgment. It will have risks more than general mutual funds.

5.As the db x-trackers DAX UCITS ETF (DR) will invest in stocks of companies with the largest and most actively traded German companies traded on the Frankfurt Stock Exchange (FSE) with a value of 30 companies to generate returns as close DAX Index.The fund has a risk of political change, economic condition and legal restrictions in Germany.Investors could lose or get a return lower than their initial investment.

6.TMBAM has an objective not to offer its fund units to or for the benefit of occupied /controlled by the USA] including those who hold US passports or greencards,2)Legal entities organized under the US law including company,Limited Partnership,etc, as well as the branch of such entities, 3) organizations belonging to the US Government in the USA and outside the USA, 4) investors who contact or receive information or place order related to TMBAM's fund or pay/receive payment with respect to TMBAM's fund in the USA. This also includes investors who use the

agent/manager in the USA to perform such functions, and 5) the assets (such as private fund/trust) of the aforesaid persons or legal entities in 1-4. As such, TMBAM reserve its right to deny or restrain subscription, allocation and/or transfer its fund unit for the above-mentioned investors, whether directly or indirectly.

7. In the event that the Management Company has entered into an obligation or agreement with a foreign state and/or the government of a foreign state or if it is required to comply with a law or a regulation of a foreign state regardless of the effective date of such obligation (e.g. the United States Foreign Account Tax Compliance Act (FATCA)), the Unitholder(s) acknowledge and agree that the Management Company may act or perform its obligation according to the relevant law and/or regulation to which Management Company is subject, including but not limited to disclosing information of the Unitholder(s) or with holding and with holdable payment payable to the Unitholder(s), and may act or perform any other action necessary for complying such relevant Thai and foreign law and/or regulation to which the Management Company is subject, and shall provide any information, document, and consent to Management Company upon request in performing such duty.

8. Any person or the same group of persons may/will hold investment units of the Fund more than one-third of the total investment units. Thus, if they redeem the investment units, the Fund may have a risk resulting to dissolve the Fund.

Risk Spectrum of the Fund

Explanation of Risk

- market risk

standard deviation : SD

Market Risk means the risk that the values of securities which the Fund has invested may increase or decrease due to outside factors such as economic/ investment situations, political factors both internally and internationally which could be considered from the Standard Deviation (SD) of the Fund. If the Fund has a high SD, it is an indicator that the Fund has high a fluctuation from the changes in the prices of securities.

High sector concentration risk

High country concentration risk

Remark : Remark : The concentration occurs among GERMANY

- exchange rate risk

Currency Risk is the possibility that changes in exchange rate will affect the value of investment units. For example, if a mutual fund invests in securities denominated in US Dollar during Thai Baht depreciation and the units are subsequently sold when Thai Baht appreciates, the mutual fund will receive lower return in Thai Baht. On the other hand, if the same fund invests in securities denominated in US Dollar during Thai Baht appreciation and the units are subsequently sold when Thai Baht depreciates, the mutual fund will receive higher return in Thai Baht. Therefore, currency hedging techniques as follows are key tools to manage such risk.

- Hedging at discretion of the fund manager: Investors may be exposed to currency

risk because it is the discretion of the fund manager whether to use a currency hedging technique.
